

DIRECTOR OF MANUFACTURING & SUPPLY CHAIN

MBA - Philadelphia, PA

Full Time

We're looking for a talented and ambitious MBA who is excited to advance innovation in commercial robotics, and to bring collaborative robots into the market.

What you'll do:

- Get your hands-dirty in a fast-paced startup environment - learn by doing
- Own the process of scaling up production of robots - establish/hire, develop and direct operations (manufacturing, purchasing, quality, and receiving/shipping) organization to meet volume ramp
- Work with engineering team to define and develop manufacturing processes
- Lead production volume ramp (zero to many robots) using lean manufacturing concepts, selective outsourcing, and product re-design
- Establish supplier relationships, negotiate contracts, place orders, and managed performance

We're looking for:

- Passion for our mission to make collaborative robots a reality, and an interest in robotics businesses
- Interest in working on a breadth of problems
- Experience in supply chain and/or design-for-manufacturing, or in an industry such as consulting
- Engineering degree and recent MBA from a top-tier program

Who we are:

We are a startup on a mission to solve the number one problem facing agriculture today, labor, by making robots like Wall-E a reality. We're doing this with our launch product, Burro, a robot that follows people and can record/retrace paths autonomously, relieving people of strenuous tasks which add little value, so that they can focus on more valuable work.
